-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 21-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haugen et al.

These claim simply define triangulation height measuring with an intended use "for reflectometric examination" of "in particular a test strip for body fluids". The claimed "detecting the distance" does not have a link to the intended use of "examination" as claimed and its use has accordingly been considered irrelevant as claimed. Consequently, the measuring head used for at least the height profiling by triangulation in either reference would have been obvious in any environment as presently claimed. Haugen further discusses making return signals "differentiable" (para. 0027). To that extent the proposed broad techniques to make the signals differentiable by pulsing or time varying would have been obvious as these are well known techniques in themselves given that they have not been presented as novel.

3. Drawings are objected in that all box representations need descriptive labels under 37 CFR 1.83.

4. Takahashi et al, Schwarz, Berger et al, Mizutani et al, and Svetkoff et al have been cited to show related height profiling.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen C. Buczinski whose telephone number is 703 305-1835.

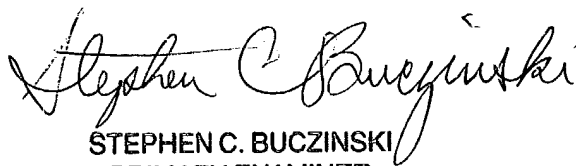

The examiner can normally be reached on Monday-Thursday, 5:30am-2:00pm.
